## EXPERIENCE SUMMARY

---

- Overall experience in **software development** with experience in building responsive web applications (frontend-heavy).
- Experience with UI development using **ReactJs, React-Native, HTML, CSS, Bootstrap, MUI, Tailwind CSS**.
- Experience in state management using **Redux, Redux Toolkit**
- Experience in consuming APIs using **Axios and Fetch API**.
- Experience with **object-oriented design, coding, testing patterns**.
- Strong written and oral **communication skills** to share ideas and concepts with the team.
- **Agile** development methodologies including scrum, Kanban, code reviews, pair programming
- Worked on design, scoping, effort estimation and status reporting for different applications.
- Strong work ethic with the ability to work in diverse teams and within scheduled timelines.

## SKILLS

---

### Languages & Frameworks:

**Front End:** ReactJs, Redux, Bootstrap, JavaScript, TypeScript, JQuery, HTML/HTML5, CSS/CSS3, three.js

**Back End:** Node.js, Express.js, MongoDB

**Mobile:** React-Native

**Database:** SQL, MongoDB

**Testing Tools:** Jest

**Integrated Development Environment (IDE):** Visual Studio Code.

**Software & tools:** GitHub, JIRA, Postman, NPM, Docker, Jenkins

## EDUCATION

---

### University of Ibadan

Bachelor of Science in Biochemistry

Ibadan, Nigeria

February, 2018

### Federal Government College Lagos. Ijanikin

WASSCE -Senior School Certificate Examination (All Distinctions)

Lagos, Nigeria

June, 2012

## WORK EXPERIENCE

---

### *WeDance (Open source)*

*Software Engineer*

Munich, Germany(*Remote*)

*Feb 2023 – July 2023*

- Developed a **Front-End** focused Web Application that unified dancers worldwide, facilitating access to dance events.
- Achieved over 90% code coverage by writing unit tests in **Jest**, improving development efficiency.
- Implemented **Fetch API** to consume **REST APIs**, maintaining dance event booking information
- Collaborated on wireframes, mockups, and prototypes, improving user experience design
- Contributed to **continuous integration and deployment**, reducing average deployment time.
- Presented, collaborated and added value to the team through participation in **peer code reviews**, providing comments and suggestions.

**Environment:** ReactJs, Redux-Saga, Vue, SCSS, Fetch API, JWT tokens, REST APIs, Git, Jenkins, Docker.

Sabi 

**Software Developer**

**Lagos, Nigeria**

*May 2022 – Nov 2022*

- Created **Front-End** focused Web Application aiming to enable and empower a broad ecosystem of users in the informal sector to distribute goods and services
- Designed reusable **Single Page Application (SPA)** in **ReactJS** by using the concept of virtual DOM.
- Ensured performance, quality, and responsiveness of applications using **CSS Media Queries**.
- Proactively track and resolve bugs, initiated Test-Driven Development by writing tests in Jest with 86% coverage.
- Reviewed the quality of code resulting in code readability increase and performance improvements.
- Involved in requirements gathering, analysis, design, and documentation of the application.

**Environment:** ReactJs, HTML, CSS, JavaScript, Webpack, Jest, Material UI, NPM, Visual Studio Code.

Sabi 

**Intern software engineer**

**Lagos, Nigeria**

*Jun 2021 – April 2022*

- Collaborated with the team to develop and enhance frontend components of web applications using ReactJS, contributing to the overall user experience improvement.
- Gained hands-on experience in developing modern, responsive user interfaces by applying knowledge of HTML, CSS, and JavaScript.
- Participated in code reviews, actively sharing feedback and suggestions to improve code quality and readability.
- Worked closely with senior developers, learning and applying best practices for software development in a professional environment.
- Demonstrated a proactive attitude towards problem-solving and debugging, aiding in the identification and resolution of frontend-related issues.
- Consumed **REST APIs using Axios** to maintain user accounts, secured APIs through **authorization**.

**Environment:** ReactJs, Redux-Thunk, Bootstrap, CSS, Jest, JWT Tokens, REST APIs, Agile.

**RideApp**

**Full Stack Developer Intern**

**Lagos, Nigeria**

*Sept 2020 – May 2021*

- Was Carried Along on a user facing application utilizing **ReactJs/Redux, Express.js, Mongoose, and MongoDB**.
- Participated in developing a user-facing applications using ReactJS/Redux for the frontend and utilized Express.js and MongoDB for the backend.
- Developed a file upload utility within the ReactJS framework, leveraging Fetch API to seamlessly integrate with REST APIs.
- Actively participated in daily meetings, fostering transparent communication regarding progress and any potential obstacles.
- Worked collaboratively and professionally with team members to achieve goals.

**Environment:** ReactJs, Redux-Thunk, CSS, JWT Tokens, REST APIs, Express.js, Node.js, MongoDB, Git.
